

# QuickChange® Moveable Barrier

We move more than 100,000 tons of concrete before you finish your morning coffee.

## Introducing the Raptor...

a unique safety device designed to reduce the severity of vehicle impacts with a utility pole or tree. Two sizes shield posts or trees with 12" (310mm) to 24" (610 mm) diameters. The Raptor can be installed at many sites that do not have the space for a traditional impact attenuator. The Raptor is tested to NCHRP 350, Test Level 1.

Call us today for a free consultation on making your roads safer, or to learn how to use your existing road infrastructure more efficiently.
